

The diagram illustrates a hierarchical search space, likely a state-space search or planning problem. The root node is `Jnfc_ceqb_5`. It branches into two main nodes: `Jnfc_ceqb_30` and `Jnfc_ceqb_31`. Each of these further branches into more nodes, creating a deep and wide search space. The nodes are labeled with strings of characters, likely representing specific states or configurations. The diagram uses a light blue background with white dashed boxes to separate levels of the hierarchy.
